- ✓ No follow up inspection required
- 🚩 Follow up inspection required
- \$ Fee charged for service*
- 📄 Risk control plan required within 5 days
- ⚠️ Probationary status enforced
- ✗ Closure required
- 👥 Office conference required

Permit Suspension

First Suspension

When a permit is suspended, the food establishment must close immediately. If the permit holder wishes to have the permit reinstated, they must schedule an office conference with the assigned inspector and a program supervisor or lead. The permit holder must provide or revise a written food safety risk control plan at or before the scheduled office conference. All fees owed to BFHD must be paid before reinstatement of the permit can occur.

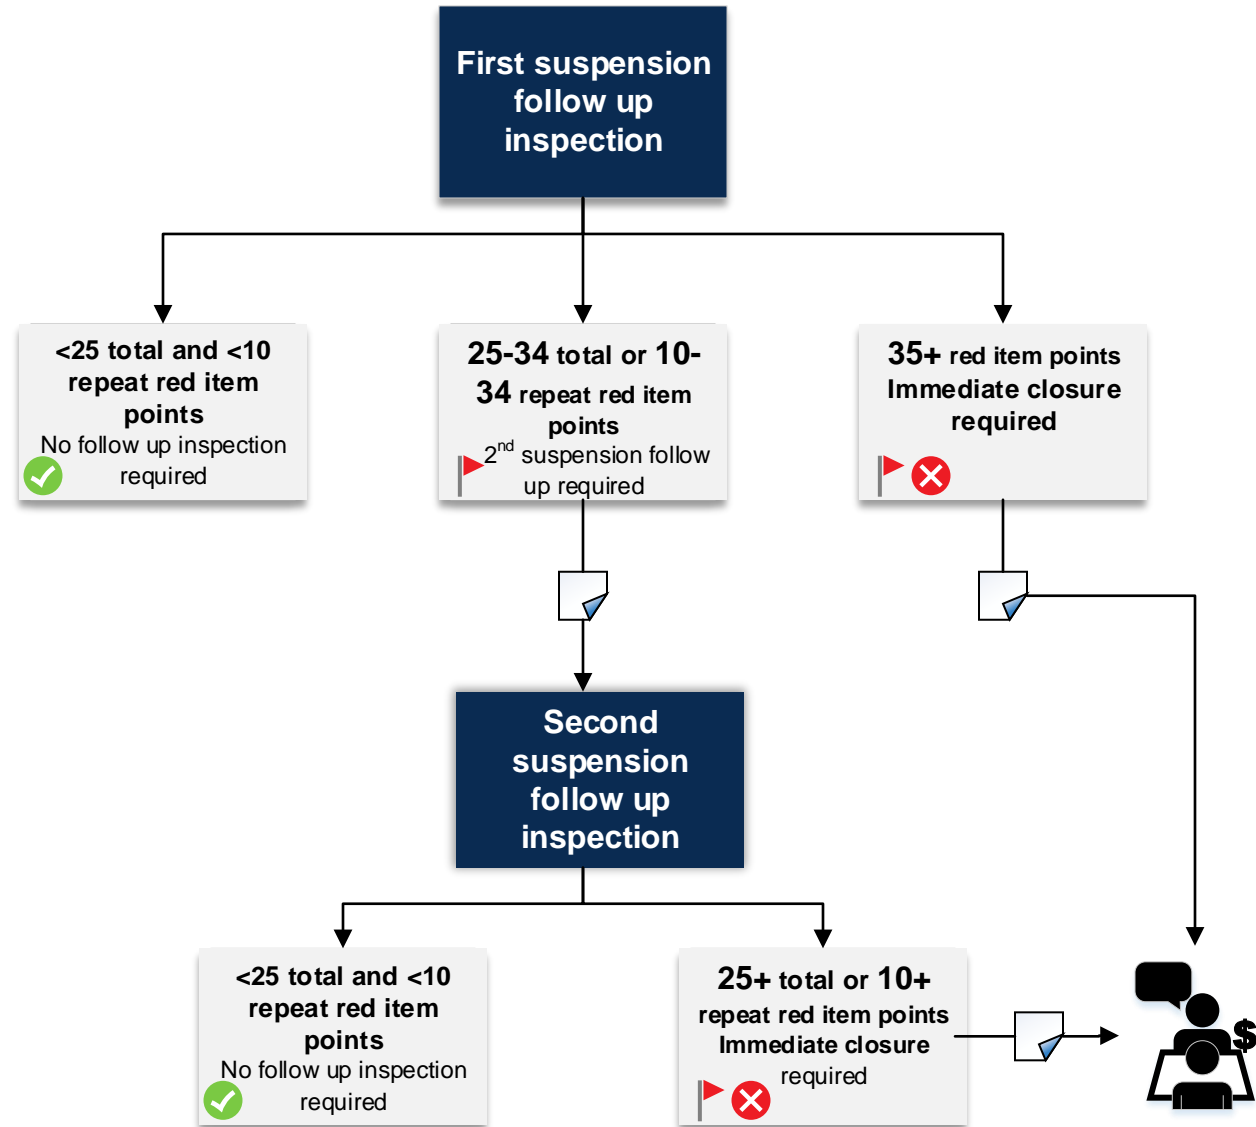

Second Suspension

When a food establishment permit is suspended a second time, the food establishment must close immediately. If the permit holder wishes to have the permit reinstated, they must schedule an office conference with the assigned inspector, a program supervisor or lead, and program director. The Benton-Franklin Health District Health Officer, or their representative, shall make a final decision at this meeting to either re-instate the permit, sustain suspension, or permanently revoke the food establishment operating permit.

Appeals

Any person who is aggrieved by any action or decision made by the Health District may request an appeals hearing before the Health Officer. See full Food Establishment Enforcement Policy for details.

Food Establishment Enforcement Closure and Suspension Policy

*Effective 8/01/2019, all follow up inspections will be charged a fee, according to the current fee schedule
